CTP Gaskets are produced from solvent free, environmentally friendly and asbestos free materials. All soft paper materials are treated with an anti-stick coating on both sides to better protect the gasket and the machine itself.

CTP Gasket Kits are assembled to provide all the required components needed to make your engine repairs in only one box. We are constantly developing new kits to have a more complete product range that covers more engines and more applications. If we do not have the gasket kit you need we will assemble it for you†.

\* Other part no. not included in the list are available. Please contact your sales representative if you have any questions. Part Numbers are used for reference purposes only

†Only if the items required are available in the replacement parts industry. Delivery time varies depending on availability of parts.

**Quality with Value Guaranteed™**
