

CTP IS PROUD TO INTRODUCE OUR NEWLY DESIGNED LABEL

CTP has redesigned its label in order to make part identification easier. The part's number will now be displayed on the top of the label, on the right side of the logo with a bigger size font. This makes it more noticeable and easier for you to find the correct part.

The description section has also been made longer to be able to print the complet word on it.

Part Number Identification

Description Section
