

CTP Dampers

CTP Dampers -

Vibration dampers are in charge of reducing the torsional vibrations originated from the crankshaft as the engine turns it. This vibration is unwanted as it causes excessive stress on the crankshaft, resulting on its breakage, which in time will also affect the engine itself. CTP vibration dampers will keep the crankshaft rotating smoothly eliminating the risk of failures of your engine.

Dampers will help reduce:

- ✓ Premature bearing wear
- ✓ Gear wear
- ✓ Crankshaft wear

Part No.	Engine Model / Application
1678123	3306B, 3306C
1678126	C15
1M7708	1673
2036088	3116, 3126
2831099	C7, C9
4W2446	3306, 330BL
4W8089	3406, 3408, 769B
5M7579	N/A
7N9312	3306, D6C, D7F
