

HYDRAULIC CYLINDER SEAL KITS FOR KOMATSU®

CTP now offers Hydraulic Cylinder Seal Kits for the most popular Komatsu® Equipment. Hydraulic cylinder seals inevitably wear over time and reach a point when they must be replaced. The most common cause of hydraulic cylinder failure is leaking seals. Leaking seals not only allow hydraulic fluid to escape the system, but allow damaging contaminants such as water, dust, debris and sometimes air, that can make their way inside the hydraulic cylinder and into the system, damaging expensive hydraulic pumps.
