

PLOW BOLTS & NUTS FOR KOMATSU®

CTP High-Strength Plow Bolts are engineered for maximum strength and performance. Our plow bolts are manufactured using high tensile strength alloy steel, black oxide coating for superior corrosion resistance, and heat-treated. All this allows for 170,000 PSI of enhanced tensile strength. Our High-Strength Plow Bolts are ideal for fastening snowplow blades, grader blades, motor grader moldboards, and cutting edges on scrapers, loaders, bulldozers, and excavators.
